

costs associated with the services provided; and

(iii) interest income earned on funds received under this chapter.

(C) For purposes of this paragraph, each entity receiving financial assistance under this chapter shall maintain records sufficient to determine the amount of such income received and the purposes for which such income is expended.

(8)(A) The Secretary shall notify the Governor and the appropriate local board and chief elected official of, and consult with the Governor and such board and official concerning, any activity to be funded by the Secretary under this chapter within the corresponding State or local area.

(B) The Governor shall notify the appropriate local board and chief elected official of, and consult with such board and official concerning, any activity to be funded by the Governor under this chapter within the corresponding local area.

(9)(A) All education programs for youth supported with funds provided under part D of subchapter II of this chapter shall be consistent with applicable State and local educational standards.

(B) Standards and procedures with respect to awarding academic credit and certifying educational attainment in programs conducted under such part shall be consistent with the requirements of applicable State and local law, including regulation.

(10) No funds available under this chapter may be used for public service employment except as specifically authorized under this chapter.

(11) The Federal requirements governing the chapter, use, and disposition of real property, equipment, and supplies purchased with funds provided under this chapter shall be the Federal requirements generally applicable to Federal grants to States and local governments.

(12) Nothing in this chapter shall be construed to provide an individual with an entitlement to a service under this chapter.

(13) Services, facilities, or equipment funded under this chapter may be used, as appropriate, on a fee-for-service basis, by employers in a local area in order to provide employment and training activities to incumbent workers—

(A) when such services, facilities, or equipment are not in use for the provision of services for eligible participants under this chapter;

(B) if such use for incumbent workers would not have an adverse affect<sup>1</sup> on the provision of services to eligible participants under this chapter; and

(C) if the income derived from such fees is used to carry out the programs authorized under this chapter.

(Pub. L. 105-220, title I, §195, Aug. 7, 1998, 112 Stat. 1057.)

<sup>1</sup> So in original. Probably should be "effect".

#### CHAPTER REFERRED TO IN OTHER SECTIONS

This chapter is referred to in sections 764, 794e of this title.

### § 3001. Findings and purposes

#### (a) Findings

Congress finds the following:

(1) Disability is a natural part of the human experience and in no way diminishes the right of individuals to—

- (A) live independently;
- (B) enjoy self-determination and make choices;
- (C) benefit from an education;
- (D) pursue meaningful careers; and
- (E) enjoy full inclusion and integration in the economic, political, social, cultural, and educational mainstream of society in the United States.

(2) Technology has become one of the primary engines for economic activity, education, and innovation in the Nation, and throughout the world. The commitment of the United States to the development and utilization of technology is one of the main factors underlying the strength and vibrancy of the economy of the United States.

(3) As technology has come to play an increasingly important role in the lives of all persons in the United States, in the conduct of business, in the functioning of government, in the fostering of communication, in the conduct of commerce, and in the provision of education, its impact upon the lives of the more than 50,000,000 individuals with disabilities in the United States has been comparable to its impact upon the remainder of the citizens of the United States. Any development in mainstream technology would have profound implications for individuals with disabilities in the United States.

(4) Substantial progress has been made in the development of assistive technology devices, including adaptations to existing devices that facilitate activities of daily living, that significantly benefit individuals with dis-

abilities of all ages. Such devices and adaptations increase the involvement of such individuals in, and reduce expenditures associated with, programs and activities such as early intervention, education, rehabilitation and training, employment, residential living, independent living, and recreation programs and activities, and other aspects of daily living.

(5) All States have comprehensive statewide programs of technology-related assistance. Federal support for such programs should continue, strengthening the capacity of each State to assist individuals with disabilities of all ages with their assistive technology needs.

(6) Notwithstanding the efforts of such State programs, there is still a lack of—

(A) resources to pay for assistive technology devices and assistive technology services;

(B) trained personnel to assist individuals with disabilities to use such devices and services;

(C) information among targeted individuals about the availability and potential benefit of technology for individuals with disabilities;

(D) outreach to underrepresented populations and rural populations;

(E) systems that ensure timely acquisition and delivery of assistive technology devices and assistive technology services;

(F) coordination among State human services programs, and between such programs and private entities, particularly with respect to transitions between such programs and entities; and

(G) capacity in such programs to provide the necessary technology-related assistance.

(7) In the current technological environment, the line of demarcation between assistive technology and mainstream technology is becoming ever more difficult to draw.

(8) Many individuals with disabilities cannot access existing telecommunications and information technologies and are at risk of not being able to access developing technologies. The failure of Federal and State governments, hardware manufacturers, software designers, information systems managers, and telecommunications service providers to account for the specific needs of individuals with disabilities in the design, manufacture, and procurement of telecommunications and information technologies results in the exclusion of such individuals from the use of telecommunications and information technologies and results in unnecessary costs associated with the retrofitting of devices and product systems.

(9) There are insufficient incentives for Federal contractors and other manufacturers of technology to address the application of technology advances to meet the needs of individuals with disabilities of all ages for assistive technology devices and assistive technology services.

(10) The use of universal design principles reduces the need for many specific kinds of assistive technology devices and assistive technology services by building in accommodations for individuals with disabilities before rather than after production. The use of
